Current role

MobiWire | Industrial Designer & UI Lead Designer

PARIS, FRANCE | 2011 to Present

Joined MobiWire as a solo designer, where I took an active role in design development & process in-house. Job function required daily interactions with R&D engineering and suppliers in China, program management and other cross-functional teams. Full understanding of the fabrication process, CMF developing and adapting design process to meet the individual requirements of each client. Travel frequently to Asia to provide production support, meet with teams and visit suppliers. Currently, my position is divided into:

- **Design Manufacturing**
- **User Interface**

PROCESS:

Collaboration: communicate and align with design, client, R&D and company strategy.

Research: understanding market, new technologies, product lines and quality for brand identity.

Presentation: hand & 3D sketching, supported by moodboards & necessary elements to well illustrate the concept.

3D data: develop 3D files with close collaboration with Chinese R&D team and suppliers

Communication: presenting the ID design with story and researches behind while showcasing solutions utilizing 3D modeling and visualisation for better understanding.

Prototyping: preparing a model with professional mockup suppliers.

CMF: selections of colours, materials and finishing to enhance and elevate the design.

UI: leading a team of UI Designers in China to support clients and products.

Development: daily work with engineering teams and product managers to ensure the successful implementation of industrial designs and solutions to maintain the agreed design intent.

Launch: assist consumer-facing brand, marketing content, and sales assets.

Past work experience

Manuel Saez | Product Design Intern

NEW YORK, USA | 2010-2011

Primarily office design projects across the production cycle. Responsible for: understanding the American market and customer's needs, market analyses and comparisons, sketching, modelling, and preparing presentations. Clients included Umbra and CB2. It was a fruitful opportunity to observe and compare different methods of working and communicating.

Wierszylowski Studio | Interior Design Intern

POZNAN, POLAND | 2008

An active role in the studio, involving several designs and interior projects. Researched the market and client environment, and supported the team with HD renders, sketches, presentations and prototyping.

Clients I had a chance to work with

Skills

DESIGN

Knowledge of Manufacturing Process & Sustainability | Driving Products from Sketch to Mass Production | Design Thinking | Aesthetic Development | Conceptualization & Ideation | Brainstorming - Storytelling | Visualization, Sketching & Digital Rendering | Brand Development | Research & Analytic Product, Trend, Market | User Experience | Project Management | Strategy & Vision Presentations

PERSONAL

Detail oriented | Experience working with international teams & suppliers | Communicative | Ability to listen carefully to team discussions and client suggestions while keeping an open mind

TECHNICAL

Prototyping | 3D Modeling | CMF & Technical Documentations |

PROGRAMS

Solidworks | Keyshot | Photoshop | Illustrator | In-Design | Microsoft Suite

OTHERS

Bachelor's Degree in Violin & Piano

EDUCATION

UAL _CENTRAL SAINT MARTINS | London | 2020

Sustainable Product Design

UAP_ University of Art | Poznan | Poland 2010

MFA _ Industrial Design - spc. Furniture

DESIGN ACADEMY EINDHOVEN | 2009

LANGUAGES

Polish | Native
